

The St James® Collection

crafted in the heart of England

European Price List

A collection of bathroom showers,
taps, mixers and accessories.

October 2012

St JAMES

• C O L L E C T I O N •

crafted in the heart of England

The St James® Collection by Marflow

A portfolio of the finest traditional bathroom taps,
showers and accessories.

The superior quality of the St James Collection sets it apart from the competition. Using only the finest materials, no compromise is made in the creation of our hand-crafted taps, showers and accessories, from the premium brass fittings through to the fine English porcelain handles.

Engineered in Britain to the highest standards, The St James Collection takes its design cues from the Victorian era following the classic lines and strong detailing of this period, whilst at the same time incorporating the latest technology to ensure that modern day living requirements are not compromised.

"Classic Victorian design crafted in England"

"Klassisches Viktorianisches Design, in Handarbeit in England hergestellt"

"Klassiek Victoriaans ontwerp gemaakt in Engeland"

"Conception victorienne classique ouvree en Angleterre"

"Diseño clásico de Victorian hecho a mano en Inglaterra"

"Классический викторианский дизайн созданный в Англии"

A proud history
of British engineering

St James - the perfect choice...

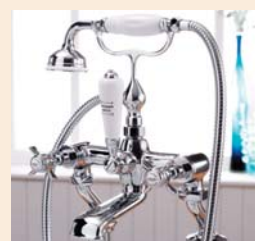

This brochure's first section displays an aspirational collection of stunning product photography, illustrating the diversity of St James brassware, from showers to accessories and lighting, for use in both traditional and modern bathroom settings.

Shower combinations shown in room settings alongside individual product photography will provide you with an excellent overview of the range right down to the last detail.

British engineering at its best

Traditional skills handed down through the generations

Technical excellence borne from over 40 years of experience

Uncompromising commitment to quality materials and finishes

Rigorous testing and quality control processes

Extensive guarantees across the whole range

Renowned customer service

A solution for every bathroom situation

The St James Collection is experienced by the discerning throughout the world

ORIENT-EXPRESS

The St James Collection can be found in a number of the exquisite Orient Express Hotels around the world.

'Our hotels are synonymous with the highest standards of quality, decoration and service and we chose the St James Collection because the attention to detail is second to none.'

Roger Collins

Vice President, Technical Services & Design

Grand Hotel Europe, St. Petersburg

Rovos Rail, South Africa

Reputed to be the most luxurious train in the world, Rovos Rail's unique train uses St James brassware in its elegant en-suite bathrooms.

Following the disastrous fire which destroyed over 100 rooms at the Queen's official residence, Windsor Castle - taps and showers from the St James Collection were supplied as part of the €45 million restoration project.

Product Selector and Price List

This section contains all the information required to choose the right product for your bathroom.

The St James Collection is an extensive range of traditional showers, taps and accessories and includes a solution for every bathroom situation. The Collection enables a personal touch by offering a choice of three distinctive handle styles, combined with a selection of brassware finishes.

Each individual St James tap, shower and accessory is cast from solid brass and hand polished before finishing with both nickel and chrome to give an unblemished long-lasting shine.

This attention to detail along with a fully integrated quality control process ensures each product leaves the factory in perfect condition.

With so many different options to choose from, rest assured that great care has been taken to ensure the authenticity of each item so that a fully co-ordinated period look is achieved for your bathroom.

St James Showering Solutions

Our shower range includes both built-in and exposed shower valves, complete with either thermostatic or manual controls, as well as a wide choice of kits and shower roses, allowing a bespoke shower solution to suit your individual requirements.

Each St James thermostatic shower is fitted with the very latest in thermostatic cartridge technology which ensures optimum temperature control and safety. The thermostatic showers are also dual control, so that water flow and water temperature can be independently operated.

Thermostatic shower controls are fitted with an internal cartridge which automatically mixes the hot and cold water to a pre-selected temperature when the shower is switched on. This temperature will be maintained throughout the duration of the shower regardless of changes in the hot and cold water pressure. Should there be a failure or significant reduction in the cold water supply, the cartridge will automatically shut down, preventing the risk of scalding.

A manual shower control requires adjustment of the temperature to accommodate changes in water pressure.

Taps and mixers from St James

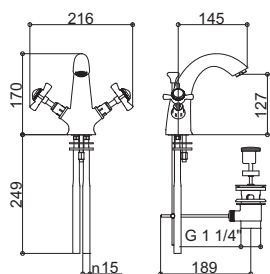

The St James Collection provides the perfect partner to your traditional basin, bath and bidet, with an extensive selection of tap and mixer styles, as well as a choice of different wastes and bottle traps.

The vast majority of St James taps and mixers are available with $\frac{1}{4}$ turn ceramic disc technology.

Ceramic discs give greater control over the water flow from your tap. Instead of the traditional washer system, two ceramic discs synchronise to turn the water on and off. The result is a smooth sensitive handle operation requiring only a quarter of a turn for the tap to be fully on. Taps using ceramic discs technology are more resistant to water erosion and require minimal ongoing maintenance.

Porcelain or metal stem accessories

The St James Collection range of accessories has been designed to complement the St James taps and showers, reinforcing the luxury element right down to the last detail.

The accessories are available with either a plain metal stem or with a porcelain stem to complement the fine English porcelain used on the tap handles, the toilet cistern handles and the basin plugs.

Lighting has been declared to conform with relevant CE Directives

Harmonised standards applied:

BS: 4533 Sections 102.4 : 1990

EN60 598-2-4: 1989

Small Edison Screw (SES) Lampholders comply with BS EN 60238 : 1999

Flexible cables comply with BS 6500: 2000

Completed fittings comply with BS EN 60598-1 : 2000

Each item is constructed and tested to comply with electrical equipment safety regulations in accordance with BS 4533.

Fittings will be deemed to conform to electrical safety directives only when fitted with our glassware.

We cannot guarantee wattage ratings when fitted with other glassware and shades.

IMPORTANT: Our fittings are not suitable for installation directly over showers or baths or in steam rooms or other areas of high humidity.

If in doubt please contact Marflow Engineering for written confirmation.

All fittings should be installed by a qualified electrician.

St JAMES

• COLLECTION •

crafted in the heart of England

Free 2 year guarantee

This guarantee offer is valid for St James Collection products and their component parts, as purchased and used in the European Union for a period of two years.

It will apply where, after the products are put into service, a defect is discovered or arises under normal use which is related to a design fault, materials or workmanship.

In the first instance, please contact your point of purchase for assistance.

All dimensions are in millimetres - unless otherwise specified.
